Development and transfer of technologies UNFCCC Side event Supporting the implementation of Technology Action Plans.

Wednesday, 18 May 2016 13:15 – 14:45 Room Bonn I/II

TNAs are a set of country-driven activities that identify and determine the mitigation and adaptation technology priorities of developing country Parties. They include technology action plans (TAPs), which are concise plans for the development and transfer of prioritized technologies that will contribute to the country's social, environmental and economic development and to climate change mitigation and adaptation. The nationally identified TAPs recommend enabling frameworks to address identified barriers to the development and transfer of prioritized technologies, and to build on identified enablers and turn them into actions. TNA and TAPs involve multiple stakeholders in a consultative process to identify the barriers to technology transfer, and measures to address these barriers through sectorial analyses.

The side event will support implementation of the Paris Agreement, via Technology Actions Plans (TAP) prepared for implementation by developing countries as part of their work on Technology Needs Assessment. The Technology Executive Committee will present updated TAP guidance.

S min Opening Mr. Carlos Fuller Chair of the SBSTA 5 min Work of the TEC on TNAs and TAPs Mr. Michael Rantil Vice-Chair of the Technology Executive Committee 15 min The TNA process of the Global GEF-UNEP TNA project and its deliverables Ms. Sara Traerup Senior Climate Change Adaptation Expert, UNEP DTU Partnership (UDP) 15 min Guidance on Technology Action Plans Mr. Wytze van der Gaast Senior Climate Change Expert JIN Climate and Sustainability 10 min Experiences and lessons learned from implementation of TAPs in China Mr. Chen Ji Division of International Cooperation National Center for Climate Change Strategy and International Cooperation China 10 min Experiences and lessons learned from implementation of TAPs in Lebanon Ms. Mary Awad Project Officer Ministry of Environment Lebanon 10 min Experiences and lessons learned from implementation of TAPs in Mauritius Mr. Oomaduth Jadoo Permanent Secretary Ministry of Environment, Sustainable Development, Disaster Management Mauritius 15 min Q&A Session	AGENDA
